

Muhammad Hafeez, Ai Engineer | Full-Stack Developer

+94766042952, haffeypythonista@gmail.com

Summary

Passionate Full Stack Developer with experience in developing AI-based projects and modern web applications. Skilled in Python, JavaScript, Flask, HTML, CSS, PostgreSQL, PyTorch, TensorFlow, Scikit-learn, and API integrations. Experienced in frontend and backend development, building responsive websites, recommendation systems, booking platforms, and interactive user interfaces. Familiar with AI concepts, database management, automation features, and creating user-friendly applications with a focus on performance and functionality. Continuously learning modern technologies and software development practices to build efficient and innovative digital solutions.

Adaptability	Experienced	Prompt Engineering	Expert

Project & Experience

Mar 2026 - May 2026 Personal Project - 01, Self Employed

Developed Aiba AI Virtual Assistant, an AI-powered assistant with 46+ intelligent features including real-time voice interaction, conversational responses, Urdu & English language support, automation commands, application launching, website navigation, and modern animated UI. Built using Python, Eel, JavaScript, and API integrations to deliver an interactive and productivity-focused user experience.

May 2026 - May 2026 Project - 03, Self Employed

Completed a full-stack restaurant recommendation and table booking web application using HTML, CSS, JavaScript, Python, and Flask. Developed responsive front-end interfaces, implemented dynamic recommendation features, managed backend logic with Flask, and integrated booking functionalities with database support to provide a smooth and user-friendly experience.

Personal Projects, Self Employed

Designed and implemented multiple full-stack and AI applications, showcasing them through GitHub repositories for version control, collaboration, and public demonstration.

Education

Feb 2024 - Sep 2024 Diploma of Education, IT, SEG Awards

Oct 2024 - Jan 2026 HND in Software Engineering, Pearson

Hobbies

- Exploring Artificial Intelligence & Emerging Technologies
- Building Creative AI Projects
- Learning Modern Software Technologies
